Grabkowski The lift gate on the Nissan Murano is usually unlocked by pressing the Unlock button twice either on your keyless remote control or on the driver's side door switch. The lift gate does not have its own door lock cylinder for you to insert the key into. However, when the battery in the vehicle is discharged, the automatic way to unlock the jack will not work. Fortunately, Nissan provides an alternative procedure that allows you to manually unlock liftgate. Get the key and access the Nissan Murano driver-side door. Insert the key into the key cylinder on the door handle on the driver's side. Turn the button to the right twice quickly (towards the lift gate). This manually unlocks the jack. Move in front of the tab and open it using the handle. Your customers can create or break your company, so it's important to invest in a customer service strategy.
